DETAILED ACTION

1. Claims 1-24 have been examined.
2. The Appeal Brief filed on 1/23/2006 was found to be persuasive. A new Office Action has been issued and is stated below.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a content server presenting content criteria, classified in class 705/14.
 - II. Claims 13-24, drawn to an end user computer providing content criteria, classified in class 705/14.

Inventions I and II are directed to related inventions. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j).

In the instant case, the preambles of the different inventions present different characterizing features for the servers and computers claimed. And, most importantly, the utilization of the content server and end user computer are different in the two inventions as these different and distinct entities present the creative selection criteria to the direct connect server in the two different inventions. The content server presents creative selection criteria to the direct connect server in independent claim 1 while, instead, the end user computer presents

Art Unit: 3622

creative selection criteria to the direct connect server in independent claim 13. Also, note that the end user computer and content server are not just different terms from claim 1 to claim 13. Rather, the direct connect server, content server, and end user computer are present in both claims 1 and 13. And, the different source for the presentation of the creative selection criteria to the direct connect server creates two different and distinct inventions. Hence, there are two different and distinct inventions, Invention I and Invention II.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Bradley J. Meier (Reg. No. 43,236) at (202) 220-4200 on 3/28/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
